

Safety Alliance and Caterpillar Safety Services Present

CREATE AND SUSTAIN A CULTURE OF SAFETY EXCELLENCE

May 24, 2019 from 8:00 a.m. to 2:00 p.m.

Purpose

After this session, participants should be able to ...

1. Demonstrate understanding of the key elements of a culture of safety excellence.
2. Better understand their personal role in leading their culture toward safety excellence.
3. Determine how to apply lessons learned in their own organization.

Session Description

The session provides an overview of the influence of culture on safety results and the key elements of a culture of safety excellence. Participants learn to personally demonstrate the importance of working safely with equal fervor to production, quality or cost. Based on Dan Peterson's "Six Criteria of Safety Excellence" and the Caterpillar Safety Services "Accountability Model," the workshop enables participants to assess their own organization's culture against these models, and apply the four steps of accountability that bring about significant, long term cultural change. Principles will be brought to life with real world examples in this engaging and interactive workshop.
